Copyright

Submission of manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e. g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, not the publisher can accept any legal responsibility for any errors or omission that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA: Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. This fee is US $0.20 per page, or a minimum of US $1.00 if an article contains fewer than five pages. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0340-1200, the volume, and the first and last page numbers of each article copied. The copyright owners's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Contents

Ambati BK, Ambati J, Mokhtar MM: Heuristic combinatorial optimization by simulated Darwinian evolution: a polynomial time algorithm for the Traveling Salesman Problem 31
Ambati J → Ambati BK
Angelaki DE, Correia MJ: Models of membrane resonance in pigeon semicircular canal type II hair cells 1
Antón PS, Lynch G, Granger R: Computation of frequency-to-spatial transform by olfactory bulb glomeruli 407
Av-Ron E, Parnas H, Segel LA: A minimal biophysical model for an excitable and oscillatory neuron 487

Bässler U, Rohrbacher J, Karg G, Breutel G: Interruption of searching movements of partly restrained front legs of stick insects, a model situation for the start of a stance phase? 507
Bajcsy R → Turner MR
Barto AG → Berthier NE
Bavarian B → Lo ZP
Beghi L, Xausa E, De Biasio C, Zanforlin M: Quantitative determination of the three-dimensional appearances of a rotating ellipse without a rigidity assumption 433
Beghi L, Xausa E, Zanforlin M: Analytic determination of the depth effect in stereokinetic phenomena without a rigidity assumption 425
Berthier NE, Barto AG, Moore JW: Linear systems analysis of the relationship between firing of deep cerebellar neurons and the classically conditioned nictitating membrane response in rabbits 99
Blackwell AW → Warren WH Jr
Blinowska KJ → Kamiński MJ
Breutel G → Bässler U
Brodin L → Ekeberg Ö
Brookes A, Stevens KA: Symbolic grouping versus simple cell models 375
Brunelli R → Tecchiolli GP

Chapeau-Blondeau F, Chauvet G: A neural network model of the cerebellar cortex performing dynamic associations 267
Chauvet G → Chapeau-Blondeau F
Correia MJ → Angelaki DE

Davenport R, Jakobsson E, Gerber B: Possible dual effect of synapses that are putatively purely excitatory of purely inhibitory: bases in stability theory and implications for neural network behavior 47
Dayan P, Willshaw DJ: Optimising synaptic learning rules in linear associative memories 253
De Biasio C → Beghi L
DeGroff D → Neelakanta PS
Denier van der Gon JJ → Tax AAM
Desmond JE, Moore JW: Altering the synchrony of stimulus trace processes: tests of neural-network model 161
Dufort PA, Lumsden CJ: Color categorization and color constancy in a neural network model of *V4* 293

Eisenhammer T, Hübler A, Packard N, Kelso JAS: Modeling experimental time series with ordinary differential equations 107
Ekeberg Ö, Wallén P, Lansner A, Tråvén H, Brodin L, Grillner S: A computer based model for realistic simulations of neural networks. I. The single neuron and synaptic interaction 81
Érdi P → Gröbler T

Faller WE, Luttges MW: Spatiotemporal analysis of simultaneous single-unit activity in the dragonfly. I. Cellular activity patterns 381
Faller WE, Luttges MW: Spatiotemporal analysis of simultaneous single-unit activity in the dragonfly. II. Network connectivity 391
Ferrán EA, Ferrara P: Topological maps of protein sequences 451
Ferrara P → Ferrán EA
French AS → Stockbridge LL

Galar R: Simulation of local evolutionary dynamics of small populations 37
Galiana HL → Smith HLH
Gan KW, Lua KT: Representing word context effect in Chinese character perception — an application of information theory 479
Gawne TJ → Optican LM
Gerber B → Davenport R
Gerstein GL → MacGregor RJ
Gerstein GL → Turner MR
Gottlieb GL → Latash ML
Granger R → Antón PS
Grillner S → Ekeberg Ö
Gröbler T, Marton P, Érdi P: On the dynamic organization of memory. A mathematical model of associative free recall 73
Gummer AW: Probability density function of successive intervals of an nonhomogeneous Poisson process under low-frequency conditions 23
Gutman SR → Latash ML

Hatsopoulos NG → Warren WH Jr
Hayes A → Morgan MJ
Hübler A → Eisenhammer T

Jakobsson E → Davenport R
Jasinschi RS: Energy filters, motion uncertainty, and motion sensitive cells in the visual cortex: a mathematical analysis 515
Joseph PJ → Optican LM

Kalish ML → Warren WH Jr
Kalveram KTh: Controlling the dynamics of a two-joined arm by central platterning and reflex-like processing. A two-stage hybrid model 65
Kamiński, MJ, Blinowska KJ: A new method of the description of the information flow in the brain structures 203
Karg G → Bässler U
Kelso JAS → Eisenhammer T
Kunz D: Suboptimum solutions obtained by the Hopfield–Tank neural network algorithm 129
Kurtz KJ → Warren WH Jr

Lansner A → Ekeberg Ö
Latash ML, Gutman SR, Gottlieb GL: Relativistic effects in single-joint voluntary movements 401
Levine MW: The distribution of the intervals between neural impulses in the maintained discharges of retinal ganglion cells 459
Levine MW, Zimmerman RP: A model for the variability of maintained discharges and responses to flashes of light 469
Lo ZP, Bavarian B: On the rate of convergence in topology preserving neural networks 55
Lua KT → Gan KW

Lumsden CJ → Dufort PA
Luttges MW → Faller WE
Lynch G → Antón PS

MacGregor RJ: Sequential configuration model for firing patterns in local neural networks 339
MacGregor RJ, Gerstein GL: Cross-talk theory of memory capacity in neural networks 351
Marton P → Gröbler T
Mokhtar MM → Ambati BK
Moore JW → Berthier NE
Moore JW → Desmond JE
Morgan MJ, Ross J, Hayes A: The relative importance of local phase and local amplitude in patchwise image reconstruction 113
Mumford D: On the computational architecture of the neocortex. I. The role of the thalamo-cortical loop 135

Neelakanta PS, Sudhakar R, DeGroff D: Langevin machine: a neural network based on stochastically justifiable sigmoidal function 331
Nelson RC: Visual homing using an associative memory 281
Nissani DN: An unsupervised hyperspheric multi-layer feedforward neural network model 441

Okajima K: A recurrent system incorporating characteristics of the visual system: a model for the function of backward neural connections in the visual system 235
Optican LM, Gawne TJ, Richmond BJ, Joseph PJ: Unbiased measures of transmitted information and channel capacity from multivariate neuronal data 305

Packard N → Eisenhammer T
Parnas H → Av-Ron E
Patton P → Thomas E

Richmond BJ → Optican LM
Rohrbacher J → Bässler U
Ross J → Morgan MJ

Samardzija N, Waterland RL: A neural network for computing eigenvectors and eigenvalues 211
Segel LA → Av-Ron E
Shamma SA → Yang X
Shimizu H → Taga G
Siminoff R: Simulated bipolar cells in fovea of human retina. III. Effects of chromatic adaptation in bipolar cell spectral responses 357
Siminoff R: Simulated bipolar cells in fovea of human retina. VI. Wavelength discrimination 365
Smith HLH, Galiana HL: The role of structural symmetry in linearizing ocular reflexes 11
Stevens KA → Brookes A
Stockbridge LL, Torkkeli PH, French AS: Intracellular nonlinear frequency response measurements in the cockroach tactile spine neuron 181
Sudhakar R → Neelakanta PS
Swindale NV: Coverage and the design of striate cortex 415

Taga G, Yamaguchi Y, Shimizu H: Self-organized control of bipedal locomotion by neural oscillators in unpredictable environment 147
Tanaka S: Phase transition theory for abnormal ocular dominance column formation 91
Tax AAM, Dernier van der Gon JJ: A model for neural control of gradation of muscle force 227
Tecchiolli GP, Brunnelli R: On random minimization of functions 501
Thomas E, Patton P, Wyatt RE: A computational model of the vertical anatomical organization of primary visual cortex 189
Torkkeli PH → Stockbridge LL
Trâvén H → Ekeberg Ö
Turner MR, Gerstein GL, Bajcsy R: Underestimation of visual texture slant by human observers: a model 215

Van Hulle MM: A goal programming network for linear programming 243

Wallén P → Ekeberg Ö
Warren WH Jr, Blackwell AW, Kurtz KJ, Hatsopoulos NG, Kalish ML: On the sufficiency of the velocity field for perception of heading 311
Waterland RL → Samardzija N
Weinberger ED: Fourier and Taylor series on fitness landscapes 321
Willshaw DJ → Dayan P
Wyatt RE → Thomas E

Xausa E → Beghi L

Yamaguchi Y → Taga G
Yang X, Shamma SA: Minimum mean square error estimation of connectivity in biological neural networks 171

Zak M: Neurodynamics with spatial self-organizations 121
Zanforlin M → Beghi L
Zimmerman RP → Levine MW
